

Medical Camp on Tuesday, November 28, 2017

A dermatologist & a general physician from, '**The Bharat Chamber Trust**' conducted medical examination for over 200 students from all the 3 depts.

The feedback from the doctors –that the common problems were fungal infection anemia, obesity, cough & cold etc.

The affected ones were given prescription &/or advice to go for a follow-up at their medical centre.

Certainly a very rare gesture these days.
